Opinions mixed as Connecticut passes compsci bill

Connecticut Gov. Ned Lamont indicated last week that he would sign a controversial bill that would make computer science curriculum a requirement in the state's public schools. Although the legislation has received praise from many educators, lawmakers and stakeholders, there have been some concerns raised over the instructional burden that adding computer science would put on teachers.

University of South Carolina announces AI institute

A shared space will allow faculty and students a chance to work together across disciplines to solve difficult problems facing various industries.

Carson City district narrows 'digital equity gap' with 1:1 devices

With more than half of the Nevada district's students on reduced-cost lunch, the devices are ensuring all students get a resource-rich education.

Missouri State taps Springfield IT director as new CIO

Jeff Coiner will take over information technology operations for the campus early next month.

Why the education CIO should be a 'servant leader'

Texas Southern University CIO Mario Berry calls for university presidents to listen to their IT leaders, whom he says must support the business.

Unlocking actionable data is critical for school districts, experts say

Commentary: K-12 school districts must get organized and make sense of their data to improve learning outcomes and protect student privacy.

U. Maine Augusta opens cyber range for hands-on student training

Cyber ranges like this one in Augusta are a trend in education, giving students a shot to practice their skills in a safe training environment.

N.Y. school district pauses on facial recognition

Just days after installation, a facial recognition system at Lockport City School District is offline as the state reviews district privacy policies.
